

LOKLiK Auto Tumbler Heat Press

LOKLiK Auto Tumbler Heat Press

Introduction

LOKLiK Auto Tumbler Heat Press is an automatic tumbler heat press that can work with both tumblers and mugs with a maximum size of 30oz. Suitable for tumbler and mug decorations via heat transfer and sublimation techniques.

Features

Automatic Heat Pressing

Unlike most tumbler and mug heat presses requiring manual pressing, LOKLiK Auto Tumbler Heat Press works with only one click. Insert your tumbler and click “Start.” Let the machine do the rest.

Suits Various Tumblers & Mugs

A longer and bigger heat plate makes it compatible with a wide range of tumblers and mugs. The maximum tumbler size is 30oz, and there can be two mugs heat pressing simultaneously.

Adjustable Heat Settings

It features an LCD screen and separate function buttons, allowing you to adjust and monitor the temperature and time freely during the operation.

Auto Shut-off Feature

This machine will shut down automatically while there is no activity in 10 minutes, ensuring the security of each user.

Colors

LOKLiK White

Instructions

1. Power on your LOKLiK Auto Tumbler Heat Press.
2. Set the proper time and temperature to preheat.
3. Insert your mug or tumbler into the machine.
4. Click the start button to apply the machine.

Tips

1. The press machine will turn off automatically after 10 minutes of inactivity.
2. The Warranty of the LOKLiK Auto Tumbler Heat Press is about 1 year.
